(54) Title: BINDER COMPOSITION AND PROCESS FOR AGGLOMERATING PARTICULATE MATERIAL

(57) Abstract: The invention pertains to a process for producing iron oxide-containing pellets wherein fine iron oxide particles are agglomerated in the presence of an inorganic and/or organic binder and a binder additive which serves to improve the preheat strength of the pellets. The binder additive can be a boron-containing compound or calcium fluoride. The invention is particularly suitable for organic binders.
